CONTENTS

No. 1, February 1993

PAGE

Ian A. McLaren. Growth in pinnipeds 1

Randolf Menzel & Avi Shmida. The ecology of flower colours and the natural colour vision of insect pollinators 81

Laurence D. Hurst. The incidences, mechanisms and evolution of cytoplasmic sex ratio distorters in animals 121

No. 2, May 1993

Mone Zaidi, A. S. M. Towhidul Alam, Vigai S. Shankar, Bridget E. Bax, Christopher M. R. Bax, Baljit S. Moonga, Peter J. R. Bevis, Clifford Stevens, David R. Blake, M. Pazianas & Christopher L. H. Huang. Cellular biology of bone resorption 197

Thomas Alderson. New directions for the anti-retroviral chemotherapy of AIDS – a basis for a pharmacological approach to treatment 265

Hugh D. Loxdale, Jim Hardie, Susan Halbert, Robert Foottit, Neil A. C. Kidd & Clive I. Carter. The relative importance of short- and long-range movement of flying aphids 291

P. A. Parsons. Stress, extinctions and evolutionary change: from living organisms to fossils 313

No. 3, August 1993

John A. Raven. The evolution of vascular plants in relation to quantitative functioning of dead water-conducting cells and stomata 337

Pavel Štys, Jan Zrzavý & František Weyda. Phylogeny of the hexapoda and ovarian metamerism 365

Joan T. Richtsmeier & Subhash Lele. A coordinate-free approach to the analysis of growth patterns: models and theoretical considerations . . 381

Gerald H. Jacobs. The distribution and nature of colour vision among the mammals 413

No. 4, November 1993

F. Martin. Acritarchs: a review 475
N. W. Simmonds. Introgression and incorporation. Strategies for the use of crop genetic resources 539
D. Lloyd & E. L. Rossi. Biological rhythms as organization and information. 563
D. C. Schneider. Scale-dependent spatial dynamics: marine birds in the Bering Sea 579
I. M. Glynn. The evolution of consciousness: William James's unresolved problem 599

INDEX OF AUTHORS

Alderson, Thomas. New directions for the anti-retroviral chemotherapy of AIDS – a basis for a pharmacological approach to treatment . . . 265
Glynn, I. M. The evolution of consciousness: William James's unresolved problem 599
Hurst, Lawrence D. The incidences, mechanisms and evolution of cytoplasmic sex ratio disorders in animals 121
Jacobs, Gerald H. The distribution and nature of colour vision among the mammals 413
Lloyd, D. & Rossi, E. L. Biological rhythms as organization and information 563
Loxdale, H. D., Hardie, J., Halbert, S., Foottit, R., Kidd, N. A. C. & Carter, C. I. The relative importance of short- and long-range movement of flying aphids 291
Martin, F. Acritarchs: a review 475
MacLaren, Ian A. Growth in pinnipeds. 1
Menzel, Randolf & Shmida, Avi. The ecology of flower colours and the natural colour vision of insect pollinators: the Israeli flora as a study case 81
Parsons, P. A. Stress, extinctions and evolutionary change: from living organisms to fossils 313
Raven, John A. The evolution of vascular plants in relation to quantitative functioning of dead water-conducting cells and stomata 337
Richtsmeier, Joan T. & Lele, Subhash. A coordinate-free approach to the analysis of growing patterns; models and theoretical considerations . 381
Schneider, D. C. Scale-dependent spatial dynamics: marine birds in the Bering Sea 579
Simmonds, N. W. Introgression and incorporation. Strategies for use of crop genetic resources 539
